Styling - Star - CSS Properties Exercise

The following exercise contains the following subjects:

- HTML

Question

In order to achieve the following with a `<div>` tag, what properties and values should be used? For each property you will apply your answer on a div containing the text Hello World

1. Add a thin, red border and Increase the font size;
2. Make the font bold and italic
3. Create a shadow around the element; make the background black; make the font white; Make the font face Arial
4. Position a 100px by 100px box in the top, right corner of the screen. The box should stay in place when the user scrolls.
5. Place a black border around the element; The border's corners should be curved; Place a space of 10px between the element's content and the border; Place a margin of 20px between this element and another others on the page;
6. Make the element be at most 35px tall and the font-size xx-large; if the element's content requires more space, a scroll bar is created
7. Hide the element from the screen (without taking up space)

Hello World!

Hello World!

Hello World!

Hello World!

Hello World!

Hello World!

It should look like that:

Hello World!

Hello World!

Hello World!

Hello World!

Hello World!

Hello World!
