

Front end development: Objects

Objects - Star - Book

The following exercise contains the following subjects:

- Javascript

Question

1. Create an object that represents a book. it should have 4-5 properties that make sense for a book to have.
2. Then write a function that will return the following description (try also using es6 syntax):

'The book <book name> was written by <author name> in the year <year first published>'

Tests

1. write a book variable that will fit the following test, and make sure the assertion doesn't throw an error.

```
console.assert(getBookDescription(book) === "The book foundation was written by Isaac Asimov in the year 1951");
```

2. Write another book object and test it with the `console.assert` function.
