

Front end development: JS

Basic js - Star - Prompt

The following exercise contains the following subjects:

- Javascript

Question

1. Write a code that prompts the user for 2 integers. print the bigger number divided by the smaller number. if the smaller number is 0 print 1.
2. Prompt an input from the user, if it is a number, add 5 to it. If it is a string add the string '!!!' to it. Use **console.log()** to print the output.
3. Prompt two strings from the user and checks if they are equal. The check should be case insensitive.

Tests

Make sure the following tests pass:

1. run your code with:
4,2 => 2
4,7 => 1.75
0, -3 => 0 (or -0)
8,0 => 1
2. run your code with:
0 => 5
-3 => 2
1001 => 1006
"hello" => hello!!!
"javascript" => javascript!!!
3. run your code with:
"go", "Go" => true
"wow", "Won" => false
"12#good", "12#GooD" => true
