Intro to jQuery - Booster - speech in right order

The following exercise contains the following subjects:

- o jQuery - selectors, DOM manipulations

Question

Create a web page with the following code:

```
<div class="speech">
  <span class="main-message">
    "We will not go quietly into the night!"
  </span>
</div>
```

Using jQuery, make the full speech appear in the right order:

Good morning. In less than an hour, aircraft from here will join others from around the world. And you will be launching the largest aerial battle in the history of "Mankind" That word should have new meaning for all of us today. We can't be consumed by our petty differences anymore. We will be united in our common interests. Perhaps it's fate that today is the Fourth of July, and you will once again be fighting for our freedom... Not from tyranny, oppression, or persecution... but from annihilation. We are fighting for our right to live. To exist. And should we win the day, the Fourth of July will no longer be known as an American holiday, but as the day the world declared in one voice: **"We will not go quietly into the night! "** We will not vanish without a fight! We're going to live on! We're going to survive! Today we celebrate our Independence Day!

Make sure to use append and prepend!
