jQuery Events - Star - Bigger on Hover

_____

The following exercise contains the following subjects:
- o   jQuery – selectors, DOM Manipulation, event listeners

Question

In CSS, add the following class:

```css
.some-container{
    font-size: 25px;
}
```

Using jQuery, create a web page with the following code:

```html
<div>
    Some text
</div>
<div>
    Some other text
</div>
```

Add an event listener to each <div>, so that when the mouse is on it, the `some-container` class will be added to it. Once the mouse is out, remove the class.
